Grand Cherokee 4x4 Systems

Quadra-Drive II

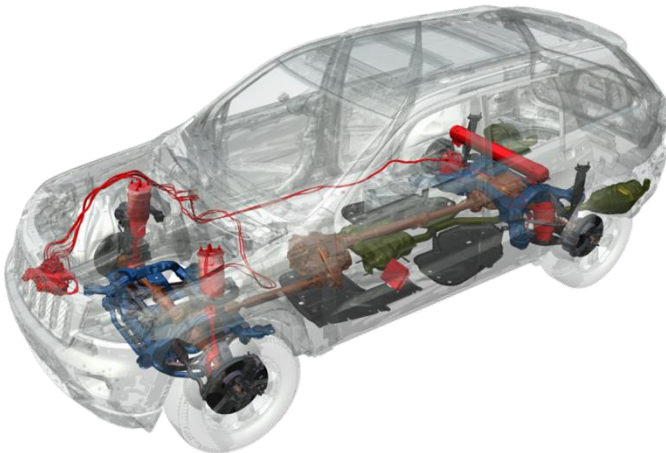

Jeep Quadra-Drive II

- Fully automatic, high range for year-round driving in all conditions
- Active electronic transfer case and rear Electronic Limited-slip Differential (ELSD)
- When traction is lost, torque can be sent to wheel or wheels with the most traction
- System works progressively and on demand
- Works together with brake traction control
- Torque can be sent front to back or side to side
- 4 Low mode locks front and rear driveshafts for low-speed power / rock crawling or towing
- Neutral position for flat towing

Jeep Quadra-Trac II

- 2-speed transfer case with Low Range
- 4 Low mode locks front and rear driveshafts for low-speed power / rock crawling or towing
- Includes Selec-Terrain
- Neutral position for flat towing

Jeep Quadra-Lift

- Full-time four-corner load leveling
- Closed-type air suspension design results in fast response time for ride height changes
- Ability to change ride height with the push of a button
- Maximum ground clearance 269.5mm
- 105mm of total travel
- Improved off-road performance by increasing ground clearance with 2 settings: Off Road 2 is 65mm higher than normal ride height (NRH), and Off Road 1 is 32.5mm higher than NRH
- Automatically lowers at highway speeds to reduce drag, resulting in better fuel consumption (15mm lower than NRH)
- Park mode lowers vehicle for easier entry & exit (40mm lower than NRH)

Jeep Selec-Terrain

- 5 modes providing best 4WD performance for any condition
- Auto – Basic mode and good for everyday driving conditions
- Mud/Sand – Maximizes traction and provides additional wheel slip
- Rock – Available in 4 Low, activates Hill Descent
- Snow – Tuned to minimize oversteer and maximize traction
- Sport – Available in 4 High, performance-based tuning for RWD feel, reduces traction control intervention
