Canada: 2024 Grand Wagoneer Fact Sheet

November 16, 2023, Windsor, Ontario - The 2024 Grand Wagoneer builds on a rich legacy of premium American craftsmanship, heritage and refinement while offering an unparalleled level of comfort and legendary 4x4 capability. Competing in the premium large SUV space, Grand Wagoneer offers an advanced powertrain lineup with premium driving dynamics and composed capability.

The epitome of American comfort and craftsmanship, Grand Wagoneer's interior exudes refinement and elegance, offering best-in-class overall passenger volume and second- and third-row legroom with the most cargo volume behind the third row. Leading-edge technologies, including the advanced Uconnect 5 system, Head-up Display, 360-degree surround view and available night vision cameras, up to 190.5 centimetres (75 inches) of total screen surface, available Amazon Fire TV Built-In and industry-first McIntosh Reference Entertainment system, offer an unmatched selection of premium interior features. Combining these attributes with strong SUV credentials, including best-in-class towing, the Grand Wagoneer builds on the original SUV by defining the next generation of an American icon.

What's New

- Hurricane Twin Turbo I-6 engine, delivering 510 horsepower and 500 lb.-ft. of torque, is standard across the entire Grand Wagoneer lineup
- Grand Wagoneer Obsidian replaces Grand Wagoneer Series II in lineup

Highlights

- Hurricane Twin Turbo 510 engine sets benchmark for power and efficiency in premium large SUV segment:
 - 510 horsepower and 500 lb.-ft. of torque
 - Up to 15% more efficient than larger V-8 engines
- Obsidian Package, standard on Grand Wagoneer Obsidian and available on Series III, includes Piano Black exterior accents, black interior accents, Gloss Black upper and lower daylight opening (DLO) molding and 22-inch polished wheels with black inserts (for Series II, Obsidian Package also includes 23-speaker McIntosh Reference audio system, adjustable roof rail crossbars, cargo cover, front console cooler, front passenger interactive display, premium tinted glass and ventilated rear seats)
- Legendary capability with Quadra-Drive II 4x4 system with active low range and rear electronic limited slip differential is standard on Grand Wagoneer Series III and optional on the Obsidian trim in the Trailer Tow package:
 - Crawl ratio of 48:1
 - Selec-Terrain traction management system
 - Up to 60.9 centimetres (24 inches) of water fording
- Quadra-Lift air suspension delivers a smooth ride and up to 25.4 cm (10 in.) of ground clearance
- Exterior styling boasts a confident and elegant design with a timeless silhouette and embodies American authenticity with artisan levels of craftsmanship
- Interiors are designed to support active customers' lifestyles:
 - Best-in-class overall passenger volume and second- and third-row legroom with the most cargo volume behind the third row
 - Standard third row with available seating for up to eight passengers
- Highly advanced user-friendly technology:
 - Up to 190.5 cm (75 in.) of total screen display available on Grand Wagoneer
 - Nearly 114.3 cm (45 in.) of screens along the front instrument panel:

- 12-inch reconfigurable centre stack touchscreen displays feature split-screen capability for dual-application operation:
 - Uconnect 5 system is standard, five times faster and features Wi-Fi capability
 - Wireless Android Auto and Apple CarPlay are standard equipment
 - Simultaneous connectivity for two Bluetooth-enabled phones
- Available Amazon Fire TV Built-In, including access to hundreds of thousands of movies, TV shows and apps
- Available 10.25-inch passenger screen has four major functions: Co-Pilot (navigation, device management), entertainment (via HDMI or Rear Seat Entertainment control), the ability to view the exterior vehicle cameras and Fire TV Built-In
- Standard 360-degree surround view camera system and available night vision camera with pedestrian and animal detection
- Wireless charge pad
- Available Digital rearview mirror
- High-strength steel frame uses advanced materials and engineering to be lightweight, yet stiff and durable
- Body-on-frame architecture features premium on-road ride-and-handling characteristics with enhanced body torsional stiffness
- Electronically controlled suspension system delivers greater on-road handling and comfort
- Industry-first McIntosh 1,375-watt premium Reference Entertainment system, featuring 23 speakers, including a 12-inch subwoofer with 3D surround system, provides an immersive audio experience
- Packed with more than 120 standard and available advanced safety and security features
- Standard and available driver-assist technologies include Head-up Display, adaptive cruise control, Active Driving Assist, night vision, drowsy driver detection and Traffic Sign Recognition
- Built in Warren, Michigan, the 2024 Grand Wagoneer is scheduled to arrive in dealerships in the fourth quarter of 2023
