Chrysler Sebring Delivers Value To The D-Segment (Outside North America)

HIGHLIGHTS

- Expressive and unique D-segment sedan design
- Dual-clutch Transmission (DCT) with economical 2.0-liter turbo-diesel engine offers maximum efficiency
- Versatile interior with available premium features including tortoise shell accents and innovative Uconnect™ Navigation
- High-level of safety and security equipment, including front-seat mounted side air bags, Electronic Stability Control (ESC) and advanced driver and front-passenger air bags

September 15, 2009, Frankfurt, Germany -

The Chrysler Sebring sedan combines expressive design, high levels of safety, reliability and fuel-efficient powertrains, all at an affordable price.

With its elegant lines and chromed touches, Chrysler Sebring offers an expressive and unique four-door sedan design in the D-segment.

Chrysler Sebring features a modern interior appearance with focus on quality, detail and execution. Sebring's interior features premium materials include Tortoise Shell accents, mechanical grains and bright accented surfaces. Standard 60/40 fold-flat rear seats make room for more gear, and a standard fold-flat front-passenger seat creates a table-like surface to maximize interior versatility.

Chrysler Sebring's innovative Uconnect™ Navigation offers information, entertainment and driving ease. Uconnect Navigation features 30-gigabytes of music and photo storage from the Uconnect Multimedia system. A 16.5-cm (6.5-inch) touch-screen display and interactive voice commands make Uconnect Navigation easy to operate, while real-time traffic monitoring keeps navigation guidance up-to-date with the latest commuting obstacles. In addition, Uconnect Phone with Bluetooth connectivity allows wireless and hands-free communication between the Chrysler Sebring and driver.

Three fuel-efficient engine options power Chrysler Sebring: a powerful 2.0-liter turbo-diesel engine paired with a manual transmission or advanced six-speed Dual-clutch Transmission (DCT), a responsive 2.4-liter four-cylinder World Engine with four-speed automatic and a 2.7-liter 24-valve V-6 engine with six-speed Auto Stick.

Chrysler Sebring also offers a combination of standard safety features, including standard side-curtain air bags and standard front-seat-mounted side air bags, standard Anti-lock Brake System (ABS), Electronic Stability Control (ESC), Brake Assist, Tire-pressure Monitoring (TPM) and all-speed traction control.

Chrysler Sebring Sedan

AT A GLANCE

- **Engineered to fit your life better**
 - Chrysler Sebring offers value-minded consumers the fuel economy, safety and reliability of the leading D-segment sedans, plus upscale styling and several useful features at an affordable price
